

THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

Winter #1 2017

It's Time to Think Planting – Get Your Crops Started Right With SoilBiotics

No, it's not too early to think about next year's crop even though the snow's flying. SoilBiotics **1 – Seed Treatment** and **Organic 1r – Seed Treatment** are non-polymer liquid Humic products that are applied to seeds up to 5 month's pre-plant. These treatments cover and penetrate the seed coat to desiccate germination inhibiting spores (fungal pathogens). This increases the ability of seedlings to quickly outgrow insect and disease pressure, reducing the need for fungicides and insecticides. Take a look at the [Trials & Results page on our website](#) and you'll see several of our 2016 Research for Results studies featuring our seed treatment on corn in Kansas and soybeans in the Ukraine:

If you'd like to see your seedling stand counts increase by 5 to 20 percent, and improve overall crop yield potential, then call your SoilBiotics sales representative or the office and ask about **1 – Seed Treatment** and **Organic 1r – Seed Treatment**.

And To All... A Good Night

Sincere thanks for your support this past year and best wishes to you and your families for a wonderful holiday season and a great 2017 from the SoilBiotics team!

Upcoming Shows

Come talk to the SoilBiotics team at the Illinois Fertilizer & Chemical Association annual convention at the Peoria Civic Center! Trade Show dates are January 18th and 19th, 2017.

Holiday Hours

The SoilBiotics offices will be closed on December 26, 2016 and January 2nd, 2017 so our staff may enjoy the holidays.
